

CONSULTING SERVICES

Some clients prefer our staff to review their receivables. This allows us to advise Management of problems they might not have the time to review. Our trained staff will completely analyze and report to the Hospital/Physician's office any ongoing problems/issues, so that they can be resolved for accurate billing and quicker reimbursement.

This service can either be performed on or off site. If the Client requests this to be done on site, the ability to see the day to day operations of the Billers and the Hospital's billing system will assist us to make a more accurate determination. If the client requests this to be done off site, our staff will be able to review the receivables using a dial-in or internet based service from our office, giving us view only access so that no information can be changed from our office.

Our consulting fees can be either on an hourly or project basis. At the end of the project, D.B.L. Associates will report to the Hospital/Physician's office our findings. It is at the discretion of the client if they want to implement based on our conclusions.
